What's not to like? Run around, be cute, and feed the entire universe to your new pet. The controls are fine, the interface is a little clunky, but the overall gameplay is mostly pretty straightforward - run around and get Maw to eat everything. Be sure to find new and interesting things to feed Maw, if only for the neat new effects it gives.. It's alright for what it is. I'd recommend based on a low price and a decent new spin on a time based survival game.

It can get pretty difficult and getting used to the auto craft system is rather annoying but having said that, the auto craft allows for a degree of pace to the game that I figure the developers were going for. It's pretty simplistic with the crafting and the goal to escape the island is pretty clear, they've even tried to add story elements which is pretty good considering it's in early access. There is a lot of potential here, much like minecraft in it's early stages to be fair.

If you were interested I have recorded the intro and tutorial as well as the first day (after I learn't to play it!) As I find videos are quite helpful in helping me decide to buy games etc.

[As well as a full playthrough with the ending on the same channel.](#)

[The game itself is pretty short, but with generated terrain every time you play is something a bit different. The tutorial isn't much to go off of and you are left learning on the fly which, again, adds to the degree of pace of the game.](#)

[I'll defo be checking up on it's progress as it updates and keen to see what it becomes.](#)

[5/7. Impossible to play. The AI instantly find you once you step out and there's no way to get away from them. And the controls suck.. Very fun game, worth the pennies.. I wanted to let you know your software sucks I bought it n now I have a account alert on it. quot:The Master would approve!" - Torgo](#)

[I'm a big fan of this game. Each level is themed around a different classic bad movie, which is awesome! The only thing that could be done to improve the game would be for the game to be riffed by the MST3K crew. I would also enjoy a sequel to be made with more levels themed after even more bad movies!. [I have seen plenty of projects march their way into early access, but I never expected a project to be this bare bones after discovering Integrity in November of last year. I have no problems with games releasing with their basic systems in place and a understandable amount of content, but it is hard to justify uploading a project that looks to have taken an hour of random tree placements and elevation adjustments. The only things you can do in the current version is cut trees, pick up sticks, toggle a building placement and explore islands covered in trees \(assuming you can travel the ocean floor without finding one of the several missing texture spots that will send you falling off the landmass\). There is no sounds outside walking noises, your sprint makes you about a hair slower than the Flash, and even the cutting animation can bug out making it impossible to cut large trees \(which serve no purpose right now\). Also experience random drops to 5 FPS or lower, which makes sprinting even more headache enduring\). Basically, what you see in the trailer is what you get, and I wanted to make sure of it before saying anything. I highly recommend the developer rethink keeping this game up until they can at least get the basic systems, basic tools, basic buildings, land mass adjustments and enemies before considering having this up. Avoid this product for the time being. It is sad to say that even an asset flip would offer more than this game right now.](#)

This game is unplayable (in term of gameplay). Not worth any money.. I can't recommend this game and that sucks. I really wanted to love it, the visuals are so cool and the whole vibe is really creepy and fun, but alas, the gameplay sucks. The developers tried to do something new with platforming, and I do appreciae innovation, however, in this instance it simply doesn't work. Controlling a character via another character is interesting but when you actually play it it's frustrating. I will keep up with this developer and see what they put out next because I think they have good ideas but this one just doesn't quite work.. It was fun... To uninstall. Here's my old review if you want to look at it: <http://i.imgur.com/LWrDdMI.jpg>

Every problem from the past review is fixed. Sean J was right and it captures everything right. My only problem with these videos is that I can't watch it all at once. Overall, I like everything from this video and I enjoy watching the interviews.. Never been so disinterested in a Choice of game. Every character has the same voice, everyone vomits exposition at the drop of a hat, and the pacing of the game is spotty. I didn't care about any of the characters, or about the backstory. The frequent flashbacks were annoying as hell. The fight and assassination scenes were good, but that's about it. Overall, the writing on this game was seriously weak.. Old kinds game.

Not bad.
